PROFILE

Dedicated **Frontend Web Developer** and Applied Computing student with a strong foundation in modern web technologies, programming fundamentals, and Object-Oriented Programming (OOP) in Java. Proven ability to translate complex Figma mockups into pixel-perfect, responsive web interfaces using React and Tailwind CSS. Eager to leverage strong logical problem-solving skills and clean coding practices to build scalable web applications.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Java, HTML5, CSS3, C
- **Libraries:** Tailwind CSS, Flowbite, Flowbite React, Ant Design, Daisy UI
- **Frontend & Mobile:** React.js
- **Performance:** Rendering Optimization, Query Optimization, Responsive Design, Web & Mobile Performance
- **Architecture:** Clean Architecture, Code Refactoring, Reusable Components, Cross-Platform Development

WORK EXPERIENCE

Frontend Web Development

[SMIT](#)

2026 – Present

On-Site

Key Projects:

1. <https://codenookdev.netlify.app/> — **CodeNook – Digital Agency Web App:**
 - Developed a fully responsive agency web platform using React and Tailwind CSS to showcase professional digital services including frontend/backend development, WordPress, graphic design, and marketing.
 - Implemented clean UI/UX components, dynamic service listings, and optimized deployment via Netlify for fast loading and seamless user experience.
2. https://syedshahfardan.github.io/my_portfolio/ — **Personal Portfolio Website:**
 - Engineered a highly responsive, custom portfolio website by converting high-fidelity Figma mockups into production-ready code with pixel-perfect precision.
 - Focused on clean component architecture and optimized performance, successfully deployed and hosted via GitHub Pages.
3. <https://syedshahfardan.github.io/responsive-website/> — **Positivus Agency Website:**
 - Developed a responsive business landing page, meticulously converting complex Figma designs into high-fidelity code with pixel-perfect accuracy.
 - Implemented mobile-first design principles and cross-browser compatibility to ensure seamless visual consistency across all device sizes.
4. <https://syedshahfardan.github.io/tastenestwebsite/> — **Tastenest – Restaurant Landing Page:**
 - Developed a multi-page restaurant web application with a focus on high-fidelity UI/UX design.
 - Meticulously converted complex, multi-page Figma mockups into a desktop-optimized, pixel-perfect interface with advanced CSS layout styling.

Backend:

<https://github.com/syedshahfardan/Banking-Management-System>—Banking Management System

(Java):

- Developed a console-based banking application using Java and IntelliJ IDEA implementing core OOP principles (Encapsulation, Inheritance, Polymorphism, and Abstraction).
- Built features for creating Current and Saving accounts with unique account number validation, secure deposits/withdrawals, and fund transfers.
- Integrated Java Collections (`ArrayList`) for dynamic multi-account management and file handling (`FileWriter`) to generate official text-based bank statements.

EDUCATION

Full-Stack Web Developer

2026 – Present

[Saylani Mass IT, Karachi](#)

Bachelor of Science in Applied Computing

2025 – 2029

[IQRA University, Karachi](#)

CERTIFICATES

- Certified in Web Developer — **NED Academy**
- Certified in Digital Marketing — **Connekt**
